<p><b><u>Ceiling Saver Safety Switch</u></b></p> <p>Protect Your Home from Damage                      Your HVAC system produces condensation as it works to cool, dehumidify, or heat your home. Naturally-occurring debris like dust and rust can sometimes cause the drain that removes condensation to become slow or clogged, creating leakage that can start small but become a big, inconvenient, and expensive mess.</p> <p> A float switch is a device designed to detect when the unit is leaking and prevent significant damage by turning the unit off, giving you time to have your trusted Anubis Mechanical technician repair the problem.</p> <p>Normal Price \$302.18   Price with service or maintenance visit: <b>\$202.18</b>                      (\$100 savings!)</p>
